## MILESTONE Acquires Invisible IT and Expands Breadth of Services

Dateline: Fremont, CA  
February 2nd, 2010

“We are pleased to announce that Invisible IT, Inc. and MILESTONE Technologies, Inc. are now one company.”

*Prem Chand, CEO and Founder, Milestone Technologies, Inc.*

Milestone Technologies, Inc. (MILESTONE), the Fremont, California-based IT service firm, has acquired Invisible IT, Inc. The announcement made on January 27th, 2010 is exciting news for the IT industry and clients of both firms. Both companies are well respected within their IT service markets, and both have important expertise for the combined IT service company.

Invisible IT, Inc. (Invisible IT), located in Mountain View, California, brings a results focused, highly experienced and talented team offering strengths in the Cisco collaboration business space among other complex IT offerings and a broad array of Professional and Managed Services. Invisible IT was recently named by Cisco Systems as the US and Canada Unified Communications Partner of the Year, West.

MILESTONE is the established leader in IT infrastructure services for many leading technology providers around the world. MILESTONE has global presence serving clients in 30 countries, a growth-oriented vision and a strong IT infrastructure management business model. In addition, MILESTONE is already implementing Cisco's new Unified Computing System (UCS) solutions for Cisco directly. Together the firms will offer clients a wide-ranging set of business solutions that support new and emerging information technologies.

“The companies’ offerings and teams are fantastic,” states Chris Moore, CEO and founder of Invisible IT. “Our clients consistently look to us for IT solutions to solve their business problems. Now we offer them more solutions, in more locations, better and faster than before.”

The companies will begin to function as one beginning in February under the MILESTONE name. Three individual service brands define the combined service offerings.

**Assess IT<sup>SM</sup>**. A common entry point for client engagement is in the engineering analysis of the IT infrastructure for peak performance. As companies look to gain productivity through technologies like remote incident management, mobile computing, collaboration technologies and/or integrating Macintosh equipment into their PC dominated infrastructure they will need to determine their readiness for these technologies. This is the mission of the Assess IT<sup>SM</sup> service offering.

**Unify IT<sup>SM</sup>**. Today Information Technology is delivered by collaboration technology, video, wired, wireless, email and data all seamlessly working together. The business solutions MILESTONE now offers include [▶ Read More](#) these technologies that allow anyone to communicate anywhere at any time. Invisible IT brings their Cisco Premier Certified Partner status to MILESTONE, delivering collaboration [▶ Read More](#) and Unified Computing Systems (UCS) under the Unify IT<sup>SM</sup> brand.

**Manage IT<sup>SM</sup>**. Providing responsive workplace IT support keeps client employees as productive as possible. Services such as remote and on-site solutions for PC and Mac, server, desktop and mobile computing devices, video conferencing support, hardware and software deployments and IT relocations are among a host of IT services available for businesses through Manage IT<sup>SM</sup>.

The companies will begin to function as one, beginning in February under the MILESTONE name. Three individual service brands define the combined service offerings.
